FLEXI DISCS

Flexi discs are traditionally made from a thin flexible PVC compound for the base colours, which are then hot-foil stamped with a 1 colour design.

- Square – 7" x 7"
- Perforated – 7" x 8" (Used if the flexi disc is to be bound in a magazine or similar)
- Round – 7" x 7"
- Square – 5" x 5"
- Round – 5" x 5"

FLEXI POSTCARDS

Flexi postcards are made using printed cardboard, and coated with a standard machine varnish. They can be printed black and white, full colour or using Pantone inks.

The standard format options are:

- Square – 7" x 7"
- Rectangular – 7" x 5"
- Perforated – 5" x 7"

They can also be shaped – just pay for a cutting tool!

PLEASE NOTE: ALL COLOURS AND NAMES ARE FOR REFERENCE ONLY AND DO NOT GUARANTEE AN EXACT MATCH

Flexi discs and flexi postcards are always pressed on one side only.

Please be aware that flexi discs contain a high level of surface noise with audio quality being lower than standard vinyl records. Louder audio is better, and no claims can be accepted for poor sounding audio.

Recommended maximum side lengths are as follows:

7" at 45 RPM: 1–3 minutes 5" at 45 RPM: 1–1.5 minutes
7" at 33 RPM: 3–6 minutes 5" at 33 RPM: 1.5–2 minutes
